

01/13/2023

PreviPharma Consulting GmbH is an internationally active research company in the field plasma protein based therapeutic development. Together with our partners from the plasma fractionation industry such as plasma fractionators, plasma donation centers and technology suppliers, our continuously growing team develops new medical and technological solutions from plasma donation to address unmet medical need.

We are expanding our team at the CUBEX41, the innovative center for medical technologies in Mannheim. Currently we are looking for two dedicated and creative

(Research) Scientist (f/m/d) in Part- or Full Time

Area of responsibility:

- Assist in the design, execution, analysis, and documentation of *in-vivo* experiments
- Assist in data analysis and interpretation and present results in lab and department meetings
- Ensure research into new and existing processes, devices, technologies, materials and techniques and develop ideas for further investigation
- Lead/support contracted research projects
- Ensure the highest levels of compliance and technical documentation in line with industry protocols
- Documentation of QM-relevant data and project reporting

Experience and Qualifications:

- A M.Sc. or Ph.D in a biomedical field (e.g. biomedical sciences, bioengineering, pharmacy) or equivalent through experience; Young professionals are welcome
- Experience in a project management or coordination function and experience in collaborating with academic groups or biotech-companies is a plus
- Practical experience in handling with blood products, protein chemistry and coagulation diagnostics are preferred
- Various analytical and protein chemical methods (practice of HPLC, ELISA, SDS-PAGE, coagulation diagnostic, etc.)
- A proactive approach to problem solving and evaluation, ability to manage and meet multiple deadlines in a fast-paced environment
- Distinct capacity for teamwork, reliability, high engagement and strong communication skills
- Communicative and fluent in English

We offer:

- Permanent employment with challenging and responsible tasks and a high potential of development
- Systematic and practical onboarding by a cooperative, motivated team, in a forward-thinking branch
